

# Thank you!

## Don't throw those away!

If you have recently replaced your cell phone or have other mobile devices or inkjet cartridges, used or unused, lying around your house, computer lab or classroom, you can donate them to Chi State LIFE Foundation and turn them into **cash for literacy grants!**

The LIFE Foundation will properly recycle them according to certified standards. This will ensure poisonous toxins and chemicals will not go into our landfills where they would hurt our environment.

**P.S. Independent copy centers** can often be persuaded to save their laser toner cartridges for you to donate.

Contact Ann Lundgren, LIFE Board member, for tips on your approach.
